

Item: 7

Development and Infrastructure Committee: 4 February 2020.

Stromness Place Plan.

Report by Executive Director of Development and Infrastructure.

1. Purpose of Report

To present the Stromness Place Plan.

2. Recommendations

The Committee is invited to note:

2.1.

That the Stromness Urban Design Framework Supplementary Guidance was due to be reviewed in 2019.

2.2.

That, during 2019, Planning Aid for Scotland (PAS) was engaged by the Council to facilitate a community engagement initiative, What's Next for Stromness?, which was carried out in partnership with Stromness Community Council and Stromness Development Trust to reflect the aspirations of these community bodies.

2.3.

That, following the community engagement initiative, the Stromness Place Plan, attached as Appendix 1 to this report, has been produced by PAS, in collaboration with the local community.

2.4.

That, although the Planning (Scotland) Act 2019 removes the statutory status of Supplementary Guidance, the Act introduces a requirement for local planning authorities to 'register' Place Plans, granting them material status in the review of Local Development Plans.

2.5.

That secondary legislation and guidance will be enacted by the Scottish Government over the coming year, detailing how Place Plans should be considered by planning authorities and how they should be formally registered.

2.6.

That, following enactment of the necessary legislation, should the Stromness Place Plan be endorsed by the Council, it is proposed to formally register the Plan.

It is recommended:

2.7.

That, in order for the Council to demonstrate broad support of its aims, the Stromness Place Plan, attached as Appendix 1 to this report, be endorsed.

2.8.

That, following enactment of secondary legislation and guidance, the Executive Director of Development and Infrastructure should formally register the Stromness Place Plan, in accordance with the Planning (Scotland) Act 2019.

3. Background

3.1.

The Stromness Place Plan was originally conceived of as a review of the Stromness Urban Design Framework Supplementary Guidance.

3.2.

The ‘What’s Next for Stromness?’ community engagement initiative, facilitated by PAS, in partnership with Stromness Community Council and Stromness Development Trust, took place during spring/summer 2019. The outcome of the engagement has culminated in production of the Stromness Place Plan, attached as Appendix 1 to this report.

3.3.

The Planning (Scotland) Act 2019 removes the statutory status of Supplementary Guidance within Local Development Plans. The new Act states that Local Place Plans may be prepared by community bodies and submitted to their local planning authority. In turn, the planning authority will have a responsibility to register the Place Plan and will take it into account in the preparation of the Local Development Plan.

3.4.

The Scottish Government will enact secondary legislation and guidance over the coming year, detailing how Place Plans should be considered by planning authorities and how they should be formally registered. It is considered that the Stromness Place Plan could be the first to be registered by the planning authority.

4. Engagement Initiative

4.1.

PAS initially conducted early research to establish major themes, issues and aspirations. This work included discussions with over 30 businesses, community groups and Elected Members.

4.2.

Two days of workshops with Stromness Primary and Stromness Academy pupils were held to ensure that young people's aspirations informed the agenda from the outset. A workshop and student survey for Heriot Watt University students and staff was organised, together with numerous one to one meetings with local community organisations.

4.3.

Aspirations and issues established during the initial stages informed the planning and content of a series of public drop-in events. These events enabled the community to discuss and agree the future vision for Stromness and the projects that could be developed to assist in delivering it.

4.4.

The main series of drop-in events took place in the Warehouse Buildings on three consecutive days from 16 to 18 May 2019. Over 150 people participated. Between each event, PAS worked to develop materials for the next day so that people could review and check that the emerging proposals did indeed reflect community aspirations. All materials were also made available online with opportunities to comment. On 13 June 2019, a follow up public event took place, to provide the community with an opportunity to review the vision, principles and projects. Over 100 people attended this event with additional reach online. In total more than 250 people participated in the events.

4.5.

At every public engagement stage during May and June 2019, proposals were published for display online through www.whatsnextforstromness.com and social media. All comments can be seen at that website.

- Twitter – total number of tweets: 33 / total number of tweet impressions: 34,163.

5. Stromness Place Plan

5.1.

The Stromness Place Plan, attached as Appendix 1 to this report, establishes a Strategic Vision of how the town could be improved as a place to live, work, learn, visit and play. It draws together a list of 22 projects within an Action Plan (section 4 of the Place Plan from page 25 onwards) which identifies timescales, key players and first steps. It also establishes six Development Principles to inform all future development.

5.2.

The community has requested that the Council show support for the Place Plan by endorsing it prior to it being brought forward for formal registration as a Local Place Plan. It is envisaged that the Vision, Projects and Principles will be used to inform the Local Development Plan review following registration of the Place Plan.

5.3.

Within the Action Plan, the Council is identified as a key player alongside other community organisations in a range of projects. At this stage there is no formal commitment from the Council to contribute towards the delivery of these projects. Each project will be considered on a case by case basis and follow the normal governance arrangements established by the Council for the prioritisation, planning, allocation of resources and delivery as appropriate

5.4.

There are also a range of key players identified, from community groups, to local residents and various sectors. It is therefore envisaged that the Community Planning Partnership Delivery Groups will have an important co-ordinating role in many of the projects. The CPP Board will be asked to consider assisting with the delivery of the Place Plan following Council endorsement.

6. Corporate Governance

This report relates to governance and procedural issues and therefore does not directly support and contribute to improved outcomes for communities as outlined in the Council Plan and the Local Outcomes Improvement Plan.

7. Financial Implications

7.1.

The costs associated with the production of the Stromness Place Plan total £59,824. These costs were incurred by the Council and claimed back, in full, from Sustrans. These costs included consultant fees and staff time to support the process.

8. Legal Aspects

8.1.

The Council is required to ensure that its endorsement and subsequent registration of the Stromness Place Plan will comply with the requirements of the Planning (Scotland) Act 2019 and such secondary legislation as may subsequently be enacted.

Executive summary

What's next for Stromness Local Place Plan is the result of a series of conversations with the people of Stromness, Orkney, that took place during Spring 2019.

It is an initiative developed in partnership with Stromness Community Development Trust, Stromness Community Council and Orkney Islands Council (OIC). Funding support was provided by Sustrans. PAS, a social enterprise and charity, was appointed as independent community engagement facilitators to prepare the plan. The Local Place Plan considers how Stromness should develop in the next 10 years, building on the regeneration and investment in Stromness over the last decade and more.

This process has enabled the development of suggestions raised by the community for the future of their town, and the start of a dialogue between all community partners and OIC. The strategic vision in chapter 4 shows the local community's key areas and priorities for future change.

The plan is intended to positively influence the future sustainable development of Stromness for the benefit of the entire community. It contains a workable action plan to address community needs comprehensively. It aims to make Stromness an accessible, active and sustainable place to live, work, learn, visit and play.

The plan also provides a series of community-based principles to guide all existing and future development and projects in Stromness.

The plan as a whole is intended to be a 'Local Place Plan' as promoted in the Planning (Scotland) Act 2019.

For the avoidance of doubt, the plans, diagrams and visualisations contained within this document are for illustrative purposes only. It will be necessary for further detailed technical analysis and community consultation to be progressed through formal development brief and planning application processes to define the final form and nature of development which will be permitted.

The format of this report is presented below:

- After assessing the local context, its challenges and opportunities in chapter 2, chapter 3 describes how the plan was co-produced with the local community in Stromness.
- Chapter 4 contains the vision with five themes, and an action plan including 18 projects.
- Chapter 5 provides more detailed information on the projects, including a time frame, delivery partners and illustrative proposals where appropriate.
- Chapter 6 sets out principles to guide future and existing development in Stromness
- Chapter 7 suggests the next steps to deliver this plan

This is an initiative by:

SCC - Stromness Community Council

SCDT - Stromness Community Development Trust

SNH - Scottish Natural Heritage

View from one of the many piers off the High Street

Over the past twenty years, the community of Stromness has benefitted from a concerted period of regeneration. The town centre’s historic buildings and public realm have received substantial investment. New and upgraded harbour facilities have been created, for example at Copland’s Dock. A new primary school and care home have been built. The town has renewables research and higher education facilities of international standing, and much more besides.

Many of these projects stemmed from the last plan prepared for Stromness, back in 2009. Not only has much of that plan now been completed, but the world has moved on. Stromness faces new challenges and opportunities, from climate change to cruise ships.

“What’s next for Stromness?” is the question that was posed to the local community in Spring 2019, through a community engagement process initiated by Orkney Islands Council (OIC), with support from local community organisations including Stromness Community Council and Stromness Community Development Trust. Funding support was provided by Sustrans. PAS, a social enterprise and charity, was appointed as independent community engagement facilitators to prepare the plan. PAS gathered current aspirations, needs and ideas from the community and stakeholders to create a shared vision and set of development principles for the town over the next 10 years.

This document – entitled Stromness Local Place Plan – outlines what’s next for Stromness for the next decade. It is the community’s vision for the future of its place and how they would like to get there.

This is supported by an action plan that express’ the community priorities for change identified through a series of projects each with a range of key players, including OIC, has been identified for it’s delivery, and post-op time-frames are suggested for each project.

Stromness has a strong, vibrant community which, compared to other Scottish towns of similar size, is remarkably active and achieves a huge amount. This plan is ambitious and is a good opportunity for connecting agendas between and within the public and private sectors and the community. If anyone can deliver it, Stromness can.

Structure of this document

- **Chapter 2** sets the plan in context
- **Chapter 3** describes how the plan was co-produced with the local community
- **Chapter 4** contains a vision and an action plan to deliver it
- **Chapter 5** provides more detailed information on the projects that make up the action plan
- **Chapter 6** sets the principles to guide future and existing development in Stromness.
- **Chapter 7** outlines next steps

Orkney Islands

Stromness

2. STROMNESS IN CONTEXT

Stromness is a coastal town on the south-west corner of the Mainland of Orkney. The town is the second largest in Orkney, with a population of approximately 1,800 (source: 2011 Census), a total which has been fairly static in recent decades.

The active harbour is one of Orkney's key arrival points by sea for ferries from the Scottish mainland, as well as serving local inter-island ferries, marine industries and smaller cruise ships.

History and heritage

Stromness has a long and unique history, as told through the Stromness Museum and the town's unique townscape and historic buildings.

Stromnessians traditionally pride themselves on their outward looking and pioneering spirit. For centuries, the town has looked to the sea, from maritime explorers like John Rae (credited with discovering the final section of the North-West Passage in the 19th century) to a contemporary focus on renewable marine technologies, fishing and nautical training. The Ness Battery, overlooking the western approach to Scapa Flow, is a well-preserved reminder of the military importance of Orkney during the First and Second World Wars.

Community facilities

Stromness has well-established facilities including a primary school, secondary school and further and higher education institutions. There is a new library, a new care home, dental surgery and GP surgery. The Community Centre, Town Hall, Pier Arts Centre and hotels are well-used community venues for the town's large number of active community groups and organisations covering drama, film, music, sports and other activities.

Leisure and recreation

The town has a number of play areas, natural and synthetic outdoor pitches, a golf club, a community garden, swimming pool with gym suite, squash court and a marina.

Other indoor sports facilities include a second gym at Stromness Academy, squash court and regular use of facilities like the Community Centre for badminton.

A small path network extends from the town centre along the coast in both directions, and inland to the viewpoint of Brinkies Brae.

Visitor economy

Stromness offers hotels, self-catering accommodation, bed and breakfasts and a campsite. Trade is focussed on the summer season, with many premises closing in the winter, which can make it challenging for business visitors to find accommodation during the off-season.

The town has a calendar of annual events, such as the Folk Festival and Shopping Week, which attract significant numbers of visitors and are important for local businesses. An increasing number of smaller cruise ships visit during the summer months.

Transport

Stromness has a regular bus service to Kirkwall, Orkney's main town. Vehicle ferries operate daily from Stromness to the Scottish mainland. There are local inter-island ferries to Graemsay and Hoy.

The small size of Stromness and its confined historical layout means that the town centre is very densely built-up. Walking is generally the simplest way to move around the historic core, although steep slopes mean it can be challenging for those with mobility issues and people with young children. Parking is limited in the historic centre and is mostly provided on the edge of the town centre.

Business and economy

For a town of its size, Stromness has a diverse economy encompassing marine and renewables research and technology (with an international reputation for wave and tidal energy), maritime transport, shellfish processing, education from primary school to higher education, tourism and, of course, town centre shops, cafes and facilities.

Opportunities and challenges for the future

Stromness has many opportunities: a marine energy and technology research sector of international standing, a busy modern harbour, rich heritage and culture, outstanding townscape and scenery, plenty of interest visitors, a good range of community facilities, and an active

and capable community. Together these form strong foundations to continue the town's strong economic and community life.

Like any town, Stromness also faces challenges:

- **Providing a range of good quality accommodation for residents, students and business visitors**, including a choice of suitable types and tenures of housing.
- **Sustaining and expanding the tourism offer and its signposting**. The seasonal nature of Orkney's tourism and relatively small visitor numbers are particular challenges.
- Sustaining and supporting local community facilities and activities in the context of reductions in public expenditure.
- Continuing to attract business, investment and population to sustain the town into the future.
- Maintaining the town's built heritage, especially the large number of historic buildings and piers, given the expense of maintenance and upgrading to modern standards, and the risk of tidal flooding from sea level rise.
- Future growth of the town, particularly given the impact of sea level rise on buildings in the town centre and the challenge of finding developable land within walking distance of the town centre.

3. ENGAGEMENT APPROACH

Participants, partners and project team at community events

Community events live recording by local artist Alex Leonard

3. ENGAGEMENT APPROACH

PAS's Charretteplus® approach has been used to facilitate creative engagement with local residents and stakeholders before, during, and after this 'What's next for Stromness' engagement process. Charretteplus® aims to work with the whole community to find out their priorities and aspirations to create a shared plan.

With a PAS project team of nine members, including facilitators, urban and landscape designers, town planners, a transport engineer and professional volunteers, PAS developed a programme of community conversations where people were encouraged to come together to discuss and share ideas for the future of Stromness.

The programme included pre-engagement discussions, drop-in sessions, school and youth club workshops, a meeting for local businesses, one-to-one discussions, surveys and online interactions.

Walkabout with Stromness Primary School pupils

Preliminary community engagement

Early research and discussions were conducted to establish major themes, issues and aspirations. Over 30 businesses, community groups and local Councillors were involved in these discussions.

Highlights of this phase included two days of workshops with Stromness Academy and Stromness Primary pupils to ensure that young people's aspirations set the agenda right from the outset; a student survey for Heriot-Watt University students; a meeting with local businesses; and numerous one-to-one meetings with local community organisations to understand their aspirations and plans.

Public events

Aspirations and issues established during the initial stages informed the planning and content of a series of public drop-in events. The basic purpose of these events was to enable the community, as a whole, to discuss and agree the future vision for Stromness, and the projects that could be developed in relation to it.

The main series of afternoon/evening public drop-in events took place in the prominent Warehouse Buildings on three consecutive days from Thursday 16 to Saturday 18 May 2019. Over 150 people participated. Between each event the facilitation team worked to develop materials for the next day, moving through a sequence of vision > projects > priorities so that people could review and check each day that the emerging proposals did indeed reflect community aspirations. At the events themselves the focus was on one-to-one discussions informed by displays of community outputs such as from the earlier schools work and emerging proposals prepared between the events. All materials were also available online, with opportunities to comment.

A follow-up public event took place on 13 June 2019, with the aim of providing the local community with an opportunity to review the vision, principles and projects as a complete package, and set priorities. Over 100 people attended this event, with additional reach online.

Online engagement

At every public engagement stage, during May and June 2019, proposals and ideas were published for display online through www.whatsnextforstromness.com and social media, with opportunities for people to comment in a way that mirrored questions asked at the public events. A related travel survey was also displayed on the website.

Engagement through social media was enabled through Facebook.com/stromnessOrkney (the most active Stromness social media page with 2,000 followers) and Twitter @WNFStromness

Social media statistics:

Action and delivery

- Place plan drafting with project team
- Place Plan drafting with the community
- Action plan for delivery

August to October 2019

Through the consultation process to prepare this plan, local people and organisations set a vision for Stromness with five themes.

Vision statement

These five themes are captured in this ten year vision statement for Stromness.

“Stromness is well-established as a hub for pioneering energy technology, as a location for international arts, and as a quality tourist and vibrant shopping destination. Its rich heritage and deep-rooted fishing and marine history have been embraced and enhanced for the benefit of all”.

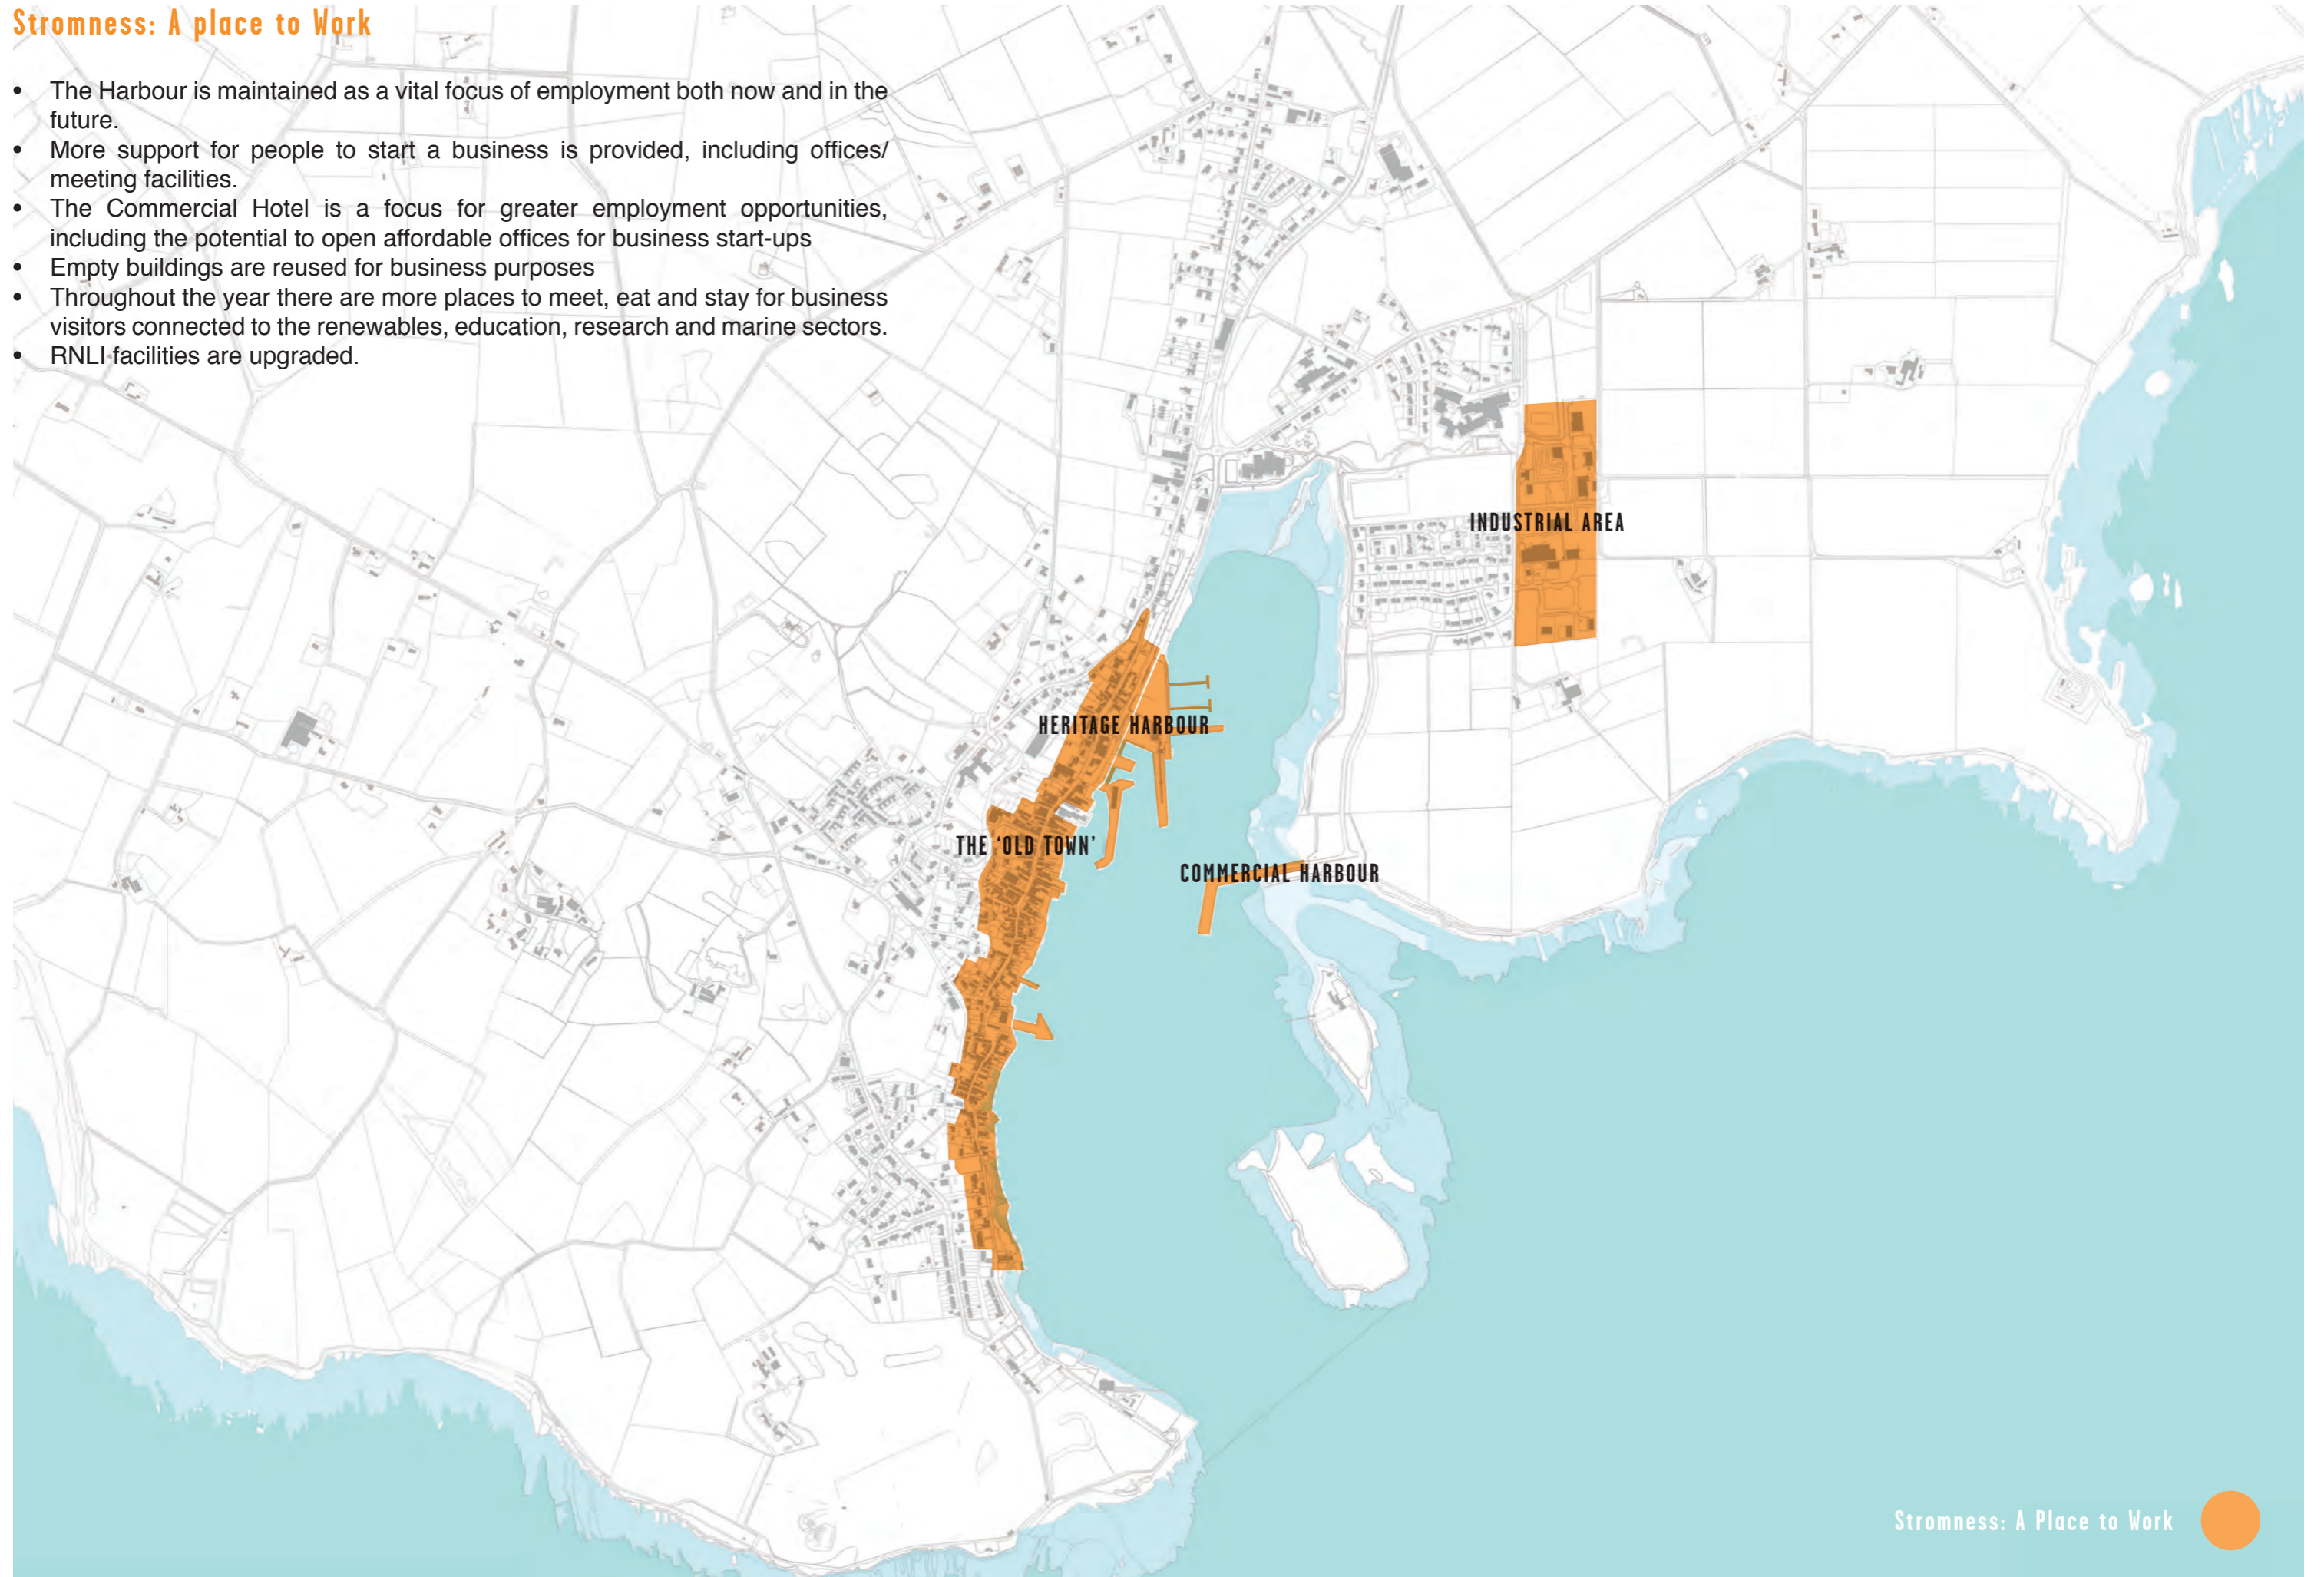

Stromness: A place to Live

- Stromness high street becomes more vibrant, with clean and well maintained pavements, lanes and closes.
- Pedestrian safety at the swimming pool roundabout is improved.
- The Town Hall and Community Centre are upgraded.
- Home ownership in the town centre is encouraged and residential car parking is improved, taking account of the increasing move towards electrical vehicles.
- There are more opportunities for self-build plots and social housing, particularly in locations close to the town centre.
- There is investment in electric vehicle charging points and cycle storage.
- Sea level rise and climate change are taken seriously and mitigated against: Considering options with local experts.

Stromness: A place to Work

- The Harbour is maintained as a vital focus of employment both now and in the future.
- More support for people to start a business is provided, including offices/meeting facilities.
- The Commercial Hotel is a focus for greater employment opportunities, including the potential to open affordable offices for business start-ups
- Empty buildings are reused for business purposes
- Throughout the year there are more places to meet, eat and stay for business visitors connected to the renewables, education, research and marine sectors.
- RNLI facilities are upgraded.

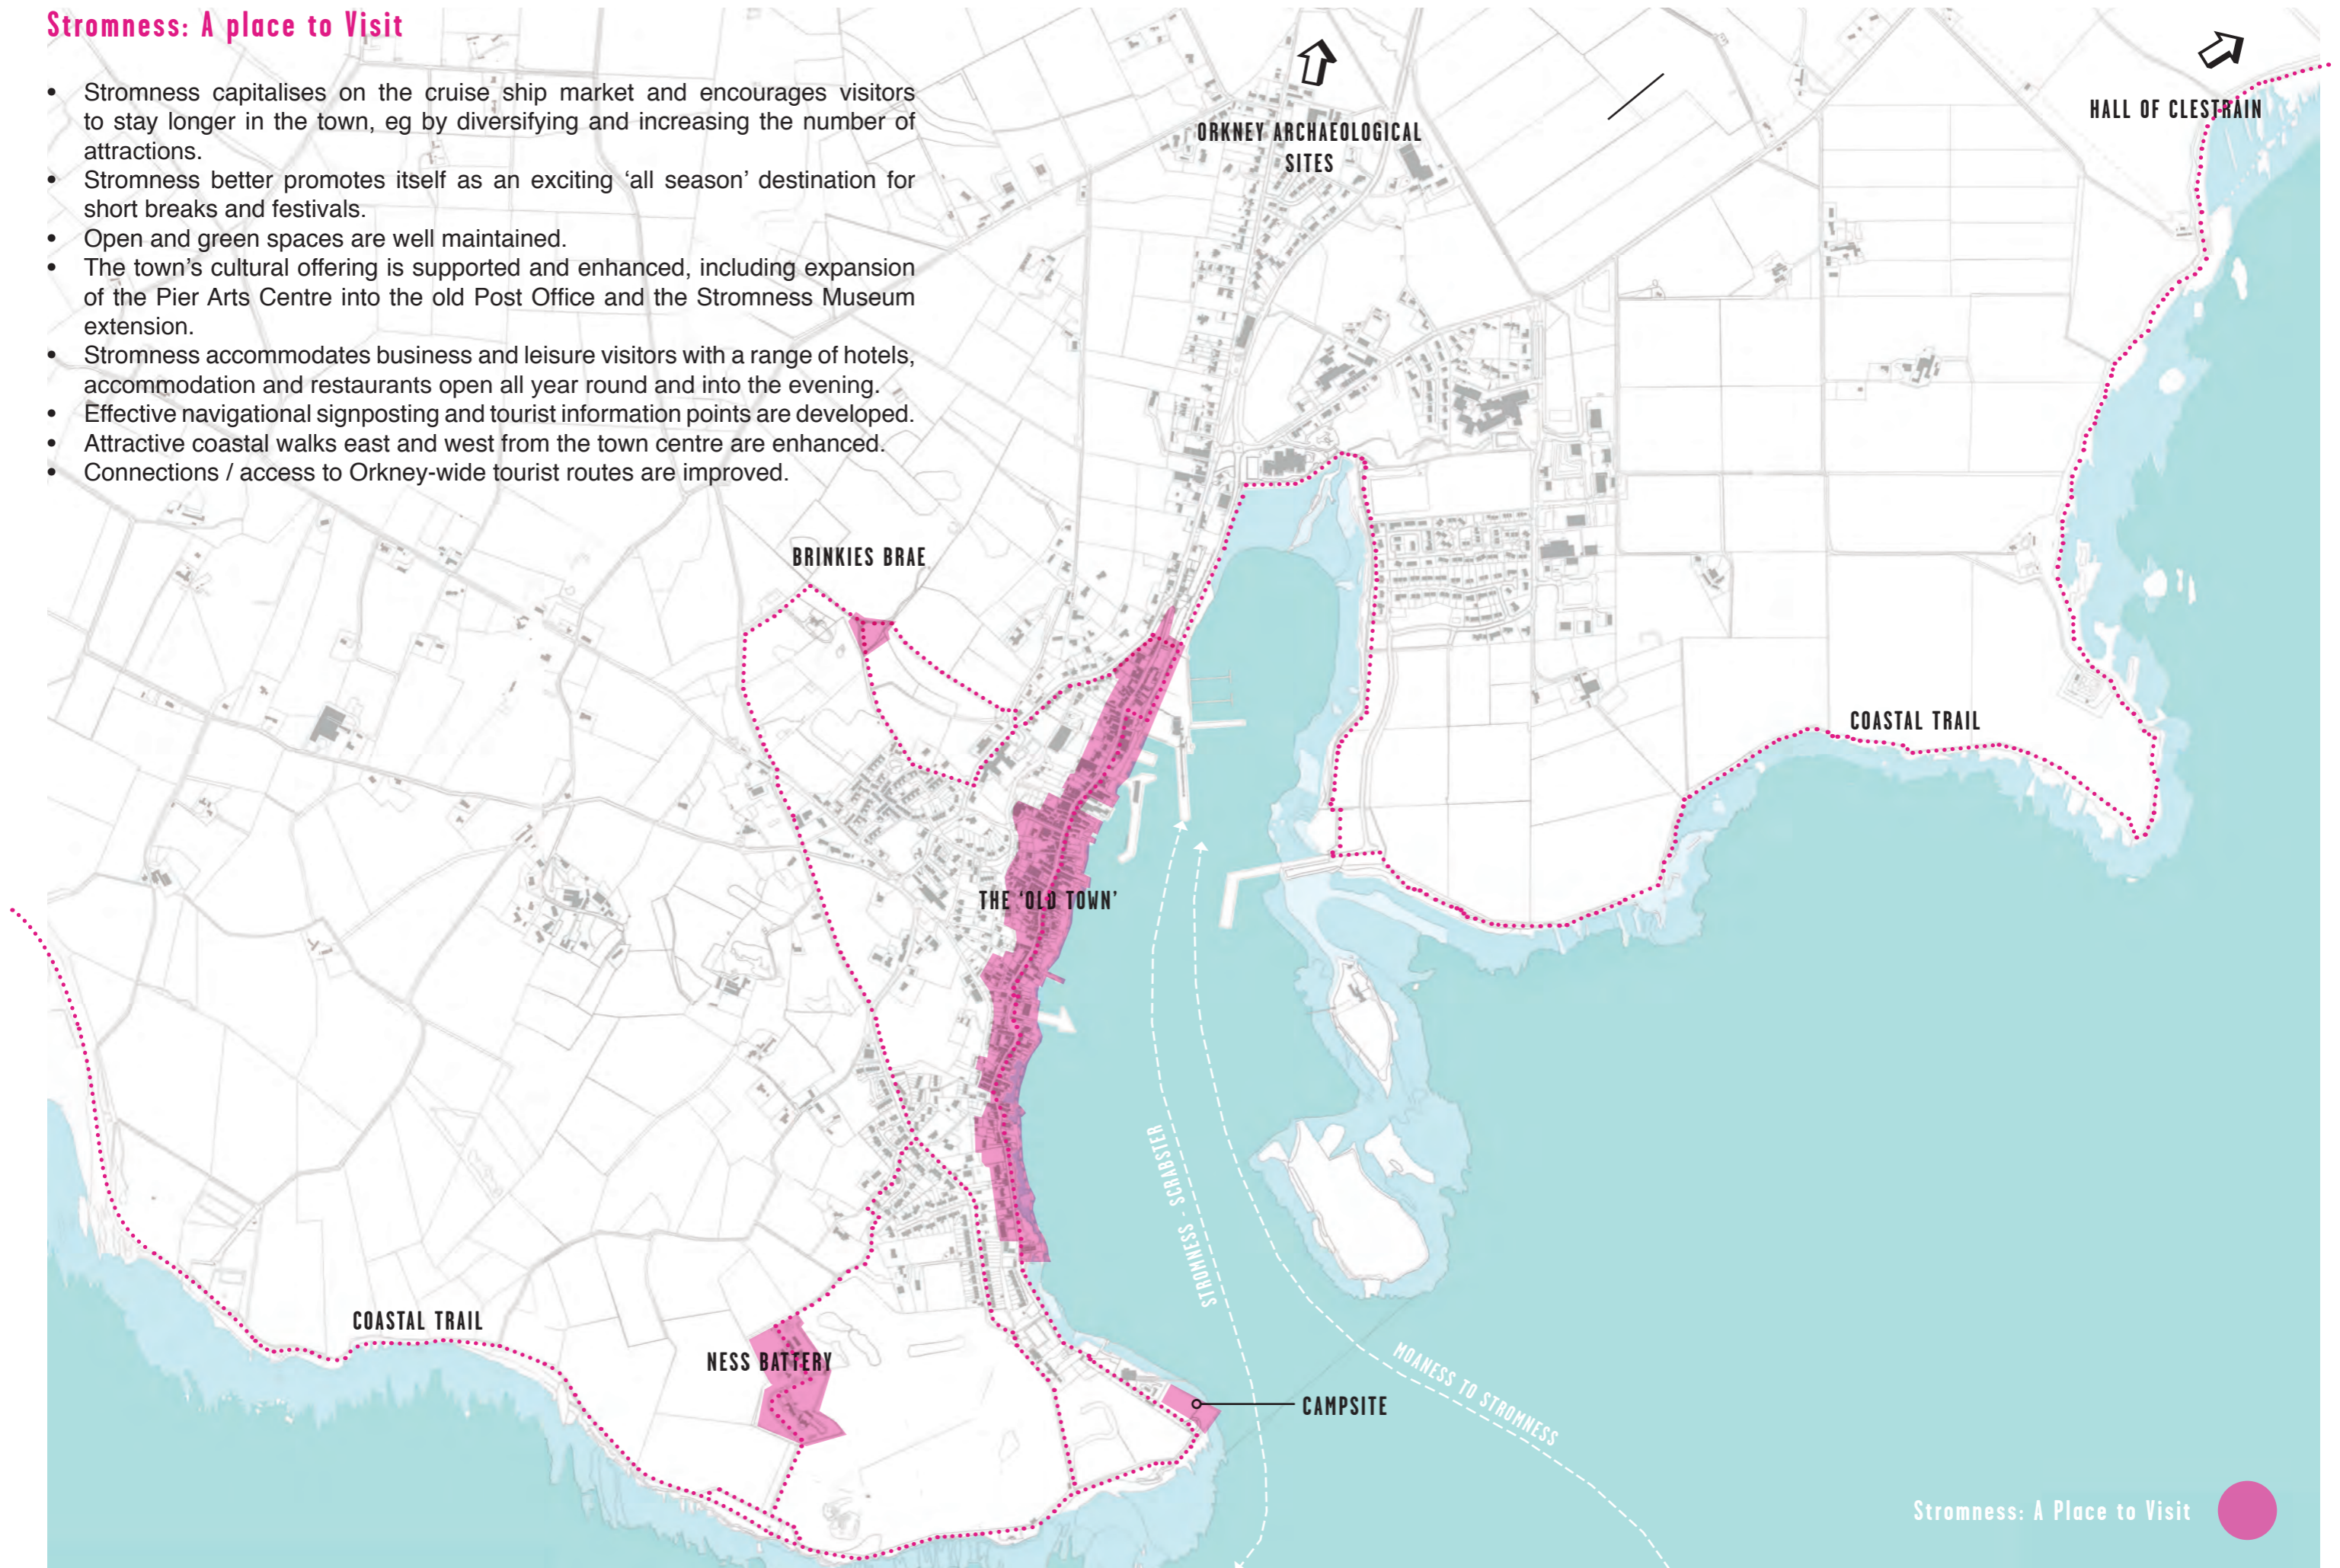

Stromness: A place to Learn

- Provide more affordable and higher quality student accommodation.
- Consider how to make transport from the Scottish mainland more affordable.
- Positively encourage more cafés, bars, bistros and shops.
- Capitalise on Heriot-Watt and Robert Gordon Universities' presence as research and education hubs.
- Encourage the Nautical College, and more generally Orkney College, to develop more activities in Stromness.

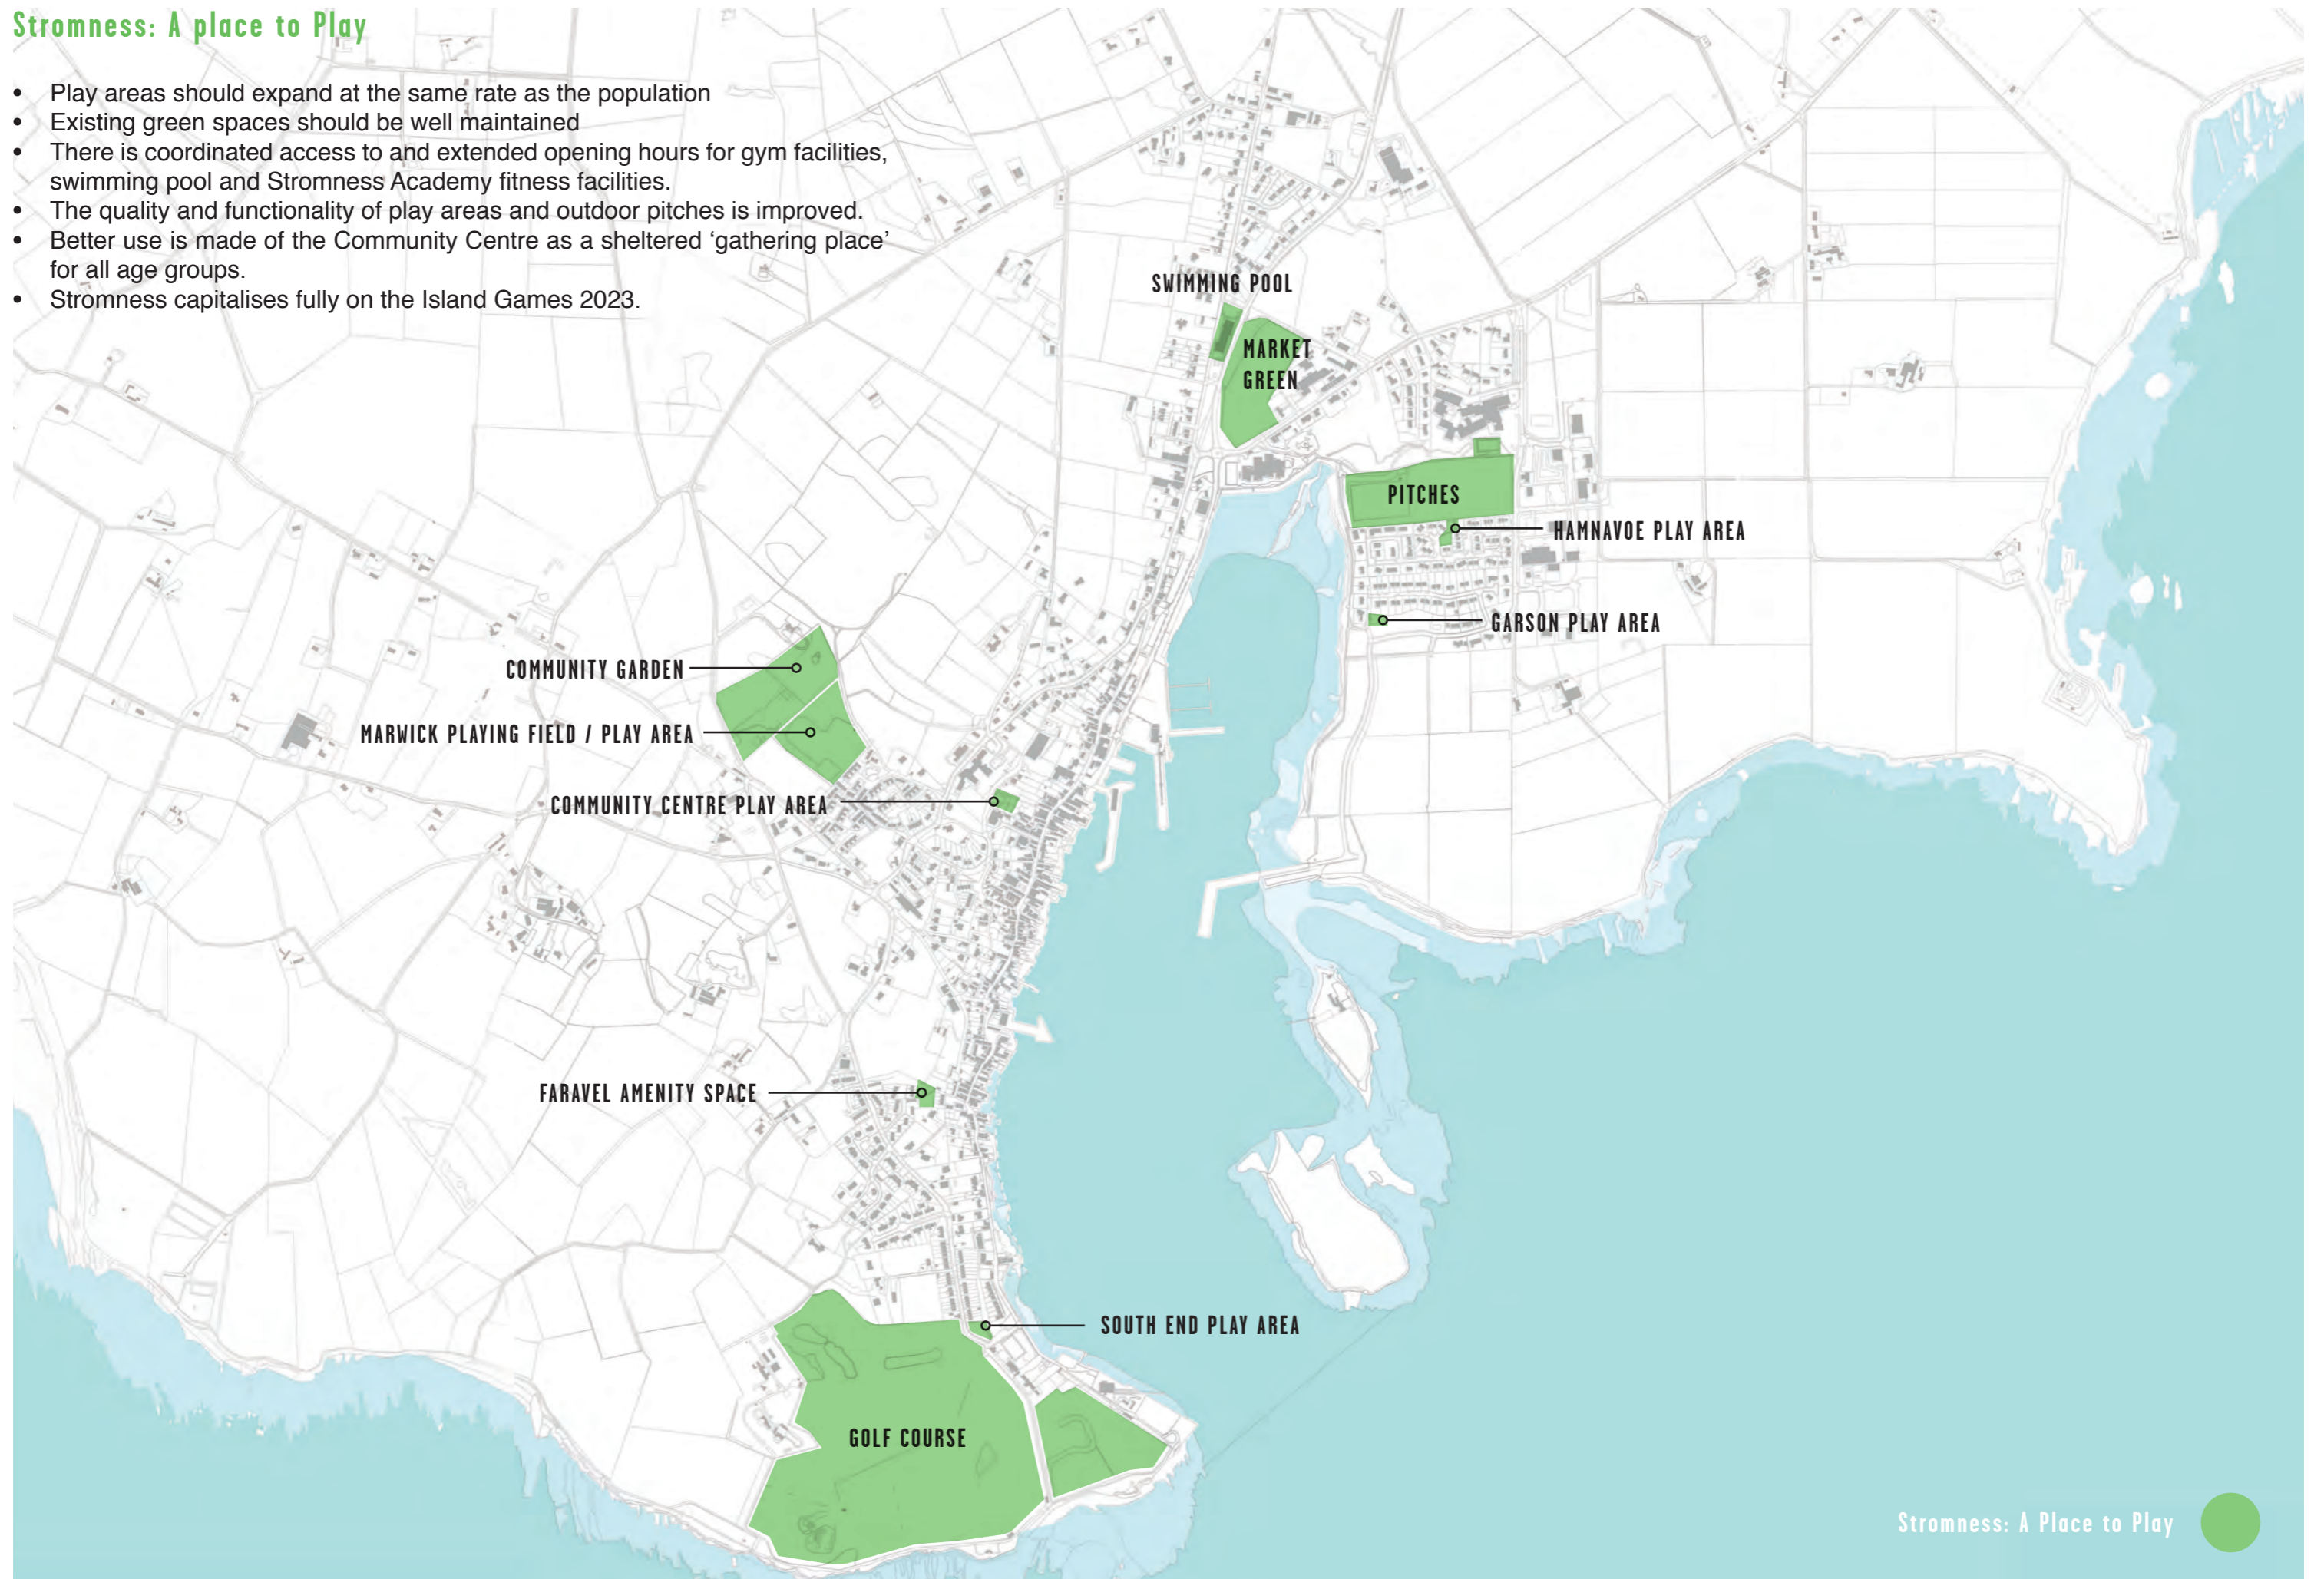

Stromness: A place to Visit

- Stromness capitalises on the cruise ship market and encourages visitors to stay longer in the town, eg by diversifying and increasing the number of attractions.
- Stromness better promotes itself as an exciting 'all season' destination for short breaks and festivals.
- Open and green spaces are well maintained.
- The town's cultural offering is supported and enhanced, including expansion of the Pier Arts Centre into the old Post Office and the Stromness Museum extension.
- Stromness accommodates business and leisure visitors with a range of hotels, accommodation and restaurants open all year round and into the evening.
- Effective navigational signposting and tourist information points are developed.
- Attractive coastal walks east and west from the town centre are enhanced.
- Connections / access to Orkney-wide tourist routes are improved.

Stromness: A place to Play

- Play areas should expand at the same rate as the population
- Existing green spaces should be well maintained
- There is coordinated access to and extended opening hours for gym facilities, swimming pool and Stromness Academy fitness facilities.
- The quality and functionality of play areas and outdoor pitches is improved.
- Better use is made of the Community Centre as a sheltered 'gathering place' for all age groups.
- Stromness capitalises fully on the Island Games 2023.

4. STRATEGIC VISION

Potential Projects in Stromness

Key:

- ① Boat heritage centre
- ② Co-ordinated management of facilities (Non-spatial projects*)
- ③ Community-led improvements to Hamnavoe and Garson play areas
- ④ Shore path lighting
- ⑤ Redevelop old post office as arts hub
- ⑥ Old primary school playpark
- ⑦ Marwick play area
- ⑧ Ness Battery
- ⑨ Path routes
- ⑩ Maintenance of open space (Non-spatial projects*)
- ⑪ Old St Peter's Care Home
- ⑫ Refurbish Town Hall and Community Centre
- ⑬ Safer route to school along Ferry Road
- ⑭ Faravel amenity space
- ⑮ Space for Drama Club (Non-spatial projects*)
- ⑯ Historic piers
- ⑰ EV and car parking (Non-spatial projects*)
- ⑱ Watersports Hub
- ⑲ Campsite extension
- ⑳ Stromness Museum extension
- ㉑ Housing (Non-spatial projects*)
- ㉒ Marina upgrade

* Non-spatial projects are not identified on plan.

PROJECT 1 BOAT HERITAGE CENTRE

Project
Historic boat centre at Copland's dock

Proposal
Orkney Historic Boat Society (OHBS) recently appointed architects Reich and Hall, Edinburgh, to design a bespoke dedicated Boat Haven / Museum building for Orkney. The location is on the site of the 19th century boatyard at Copland's Dock. Outline plans have been discussed with OIC planning department.

The proposed boat heritage centre would be a centre for traditional boat-building and repair, offering educational and visitor opportunities, and be a key destination along the coastal walk around Hamnavoe.

PROJECT 3 HAMNAVOE AND GARSON PLAY AREAS

Project
Community-led improvements to Hamnavoe and Garson play areas

Proposal
Improve existing play areas within context of OIC's Orkney Play Area Strategy. Consider teenagers' play facilities such as skate park and multi-generational outdoor exercise equipment.

Key Players
Local residents, OIC, landowner

First steps
Form residents' group, explore with OIC

Timescale
Short-term

Draper's Field, London

Possil Gym Wall, Glasgow

Hamnavoe play area

The Hamnavoe and Garson play areas are small grassed and fenced spaces set within the main housing area. The play areas have fallen into disrepair, with most pieces of play equipment needing repairing or replacing along with the safety play surface (example shown below).

Existing view

Ideas for future change

1. Potential for a range of age groups to play in the same space, e.g. parkour, skateboard
2. Bespoke play equipment to community design / needs
3. Surfaces with patterns designed by local children
4. External softplay / seating
5. Temporary structures / decking
6. Extent of soft surface subject to community conversations
7. Colour to be introduced into play space

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 4 LIGHTING ON SHORE PATH

Project
Improve lights on shore path to Copland's Dock

Proposal
Pole-mounted or other additional lighting to cast better light during dark evenings.

Key Players
SCC, Renewables / tech sector, OIC, landowner

First steps
Agree scope of project, engage with planning department, prepare proposals and seek funding.

Timescale
Short-term

Helsingborg waterfront, Sweden

Moscow, Russia

Shore path

The photograph of the existing shore path below shows a narrow, gravel path, approximately 1.2m wide. The landscape through which the path runs is rural in character, primarily grass with patches of reeds, but little or no wildflowers or plants with colour. There are no formal areas or facilities to rest, sit or take in the amazing views across the bay. There is currently no lighting, signage or wayfinding measures. There is no formal access to the beach or the waterfront.

Existing view

Ideas for future change

1. Locally produced signage - materials to fit location
2. Coastal wildflowers to add colour and seasonality
3. Upgrading of footpath to accommodate shared use
4. Lighting / seating cubes to light footpath and provide areas for resting
5. Timber deck and bench with multi-directional views

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 5 OLD POST OFFICE

Project

Redevelop old post office as arts hub.

Proposal

Redevelopment as a home for creative learning and participation - a dedicated space for the Pier Arts Centre's learning programme enabling closer collaboration between the local community and artistic practitioners.

Key Players

Pier Arts Centre, OIC, Highlands and Islands Enterprise, Creative Scotland (Islands Deal draft project).

First steps

RIBA Stage 3, Fundraising

Timescale

Short-term

Next steps

The former Stromness Post Office building offers the ideal location to develop new and innovative facilities and programmes for the Pier Arts Centre, providing space and opportunities for collaboration with other cultural organisations in Orkney and further afield.

The re-development of this prominent civic building in the heart of Stromness will create new and dynamic public spaces for performances and community events, and help revitalise the town's commercial centre.

The project aims to establish a dedicated space for the Pier Arts Centre's learning programme. It will position the Pier Arts Centre as a local creative venue and residency facility enabling closer collaboration between the local community and artistic practitioners. It will help boost the burgeoning calendar of festivals, provide links to schools and academic partners, while establishing a new means of engagement with growing and diverse audiences, both local and visiting.

The development will also offer crucial additional space for the Pier Arts Centre to expand facilities for the care of its world-class and growing collection.

View from Pier Arts Centre

Existing Stromness Post Office

Aerial view across bay to town centre and harbour

PROJECT 6 MARWICK PLAY AREA / FIELD

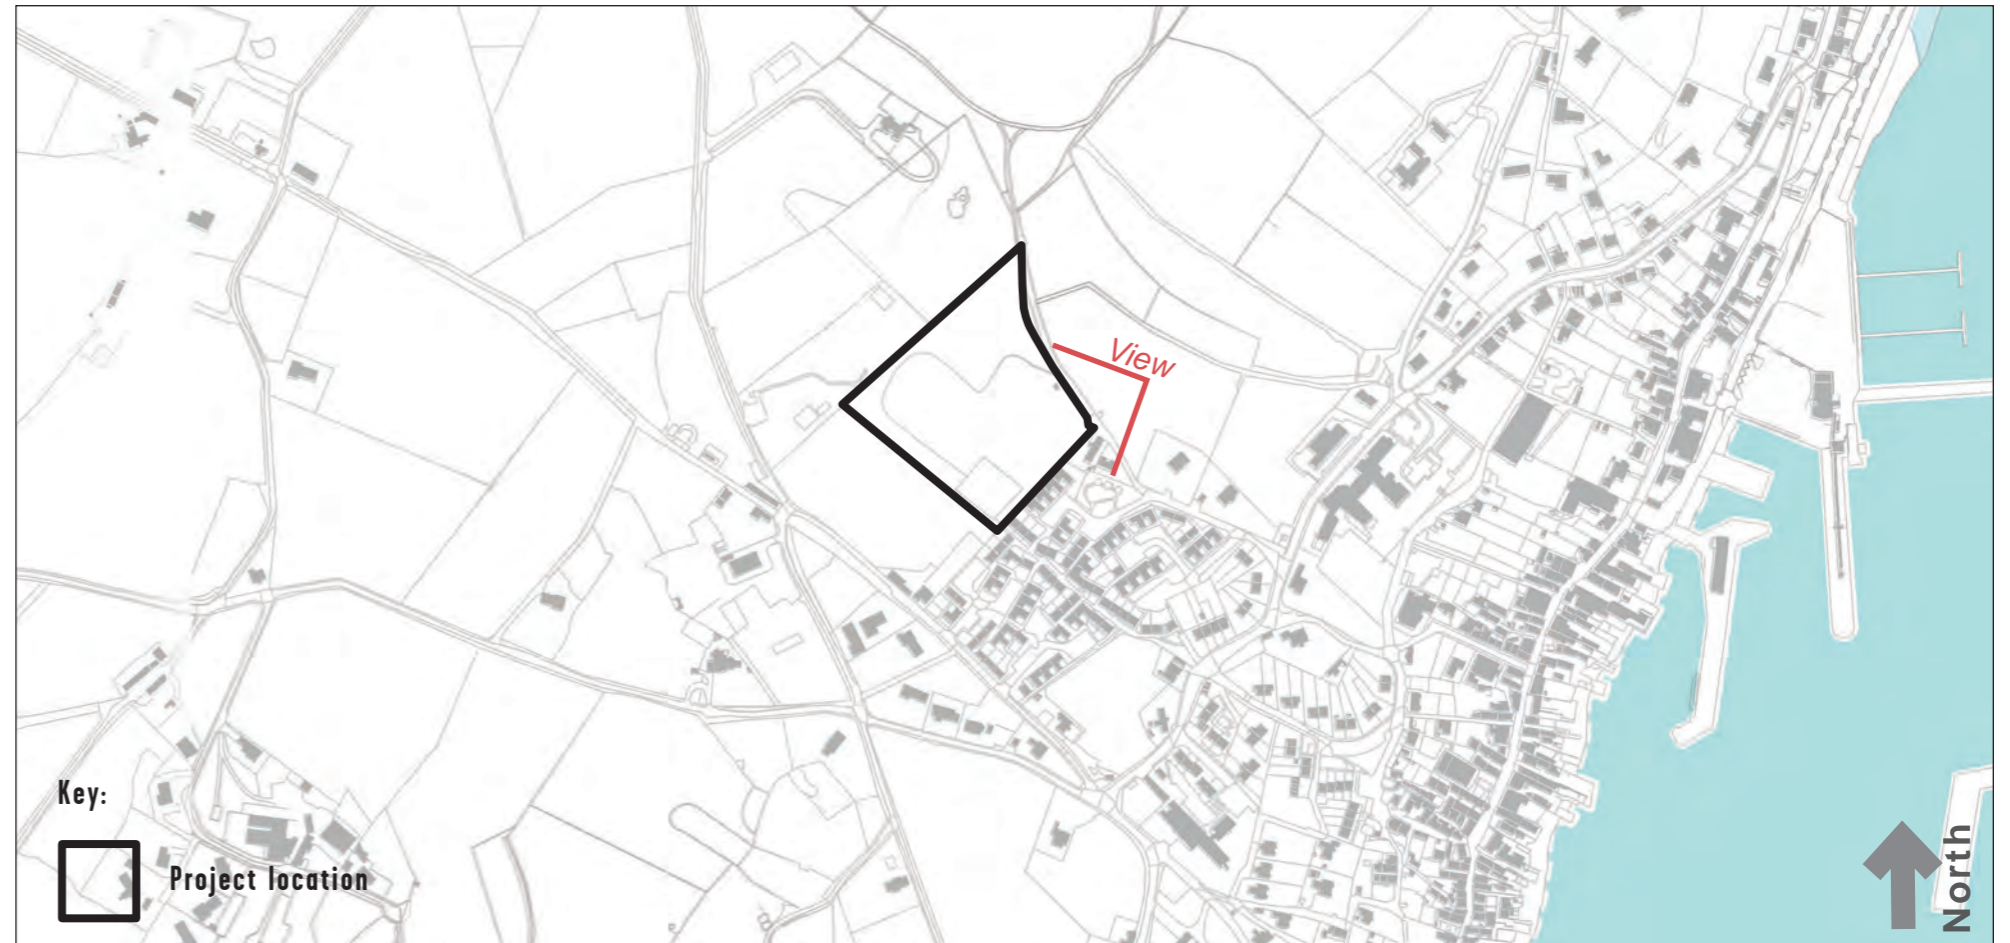

Project
Marwick play area and playing field

Proposal
Upgrade as natural play area, integrate access with Stromness Community Garden and Brinkies Brae paths. Improve accessibility & landscape, include more colour and greenery in the area, natural play, spaces for scooters/ bikes (non-motorised items), running track.

Key Players
Grieveship Residents Association,
Community Garden, OIC, SCDT

First steps
Agree scope of project, prepare proposals and seek funding

Timescale
Short-term

Kimberley Park, Cornwall

The Hague, Netherlands

Marwick play area / field

The Marwick Play area is located at the western edge of the town, immediately adjacent to the Grieveship residential area. The site, approximately 1.7ha, consists primarily of rough, steeply sloping grassland, falling north west to south east. Whilst the site connects to the Grieveship housing to the south, it also connects to other community facilities in the wider setting, with the Stromness Community Gardens immediately to the north and routes along the eastern edge to Brinkies Brae paths further north.

The site currently caters for informal play in its north western half, whilst a small play area in the south western corner provides for more formal play. The play equipment is old and needs replaced.

Existing view

Ideas for future change

1. Existing play area upgraded
2. Playing field upgraded
3. Facilities for wheeled play, BMX, bikes and blades (non-motorised items)
4. Natural play mounds including tunnels, pole play, slides and steps
5. Paths upgraded and extended to Brinkies Brae
6. Habitats enhanced with wildflowers and natural vegetation
7. Signage

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 7 OLD PRIMARY SCHOOL PLAYPARK

Project
Refurbishment of old primary school outdoor spaces.

Proposal
Improve outdoor space at old primary playpark and at the front and to the side of ORIC former Primary School building, with a focus on renewables / technology, arts and greenspace. Improve linkage and pedestrian access from town centre and Warehouse Buildings to ORIC Campus. Potential for addition of a flexible visitor and interpretation centre telling the energy and sustainability story of the Isles.

Key Players
OIC, renewables sector, SCDT

First steps
Discuss possibilities, engage with planning department, prepare proposals and seek funding

Timescale
Short to medium term

View from old primary school site - June 2019

Image of precedent project, BRE Ravenscraig interpretation centre - passive design & pre-fabricated unit

Old primary school playpark

The old primary school site lies at the northern end of the town, surrounded primarily by residential properties. The high street lies directly east whilst the old primary school new build is immediately south. The site is approximately 1500m², terraced with two hard landscape platforms that gently slope west to east. The platforms contain some old remnants of former play structures and planting, whilst the lower terrace has a number of disused outbuildings. Surrounding and enclosing the site is a 2m+ natural stone wall, and at the eastern edge of the site a steel mesh fence retains balls from play.

There is no direct vehicular route, although access could be managed from Franklin Road. Pedestrian access is also limited but available from a narrow vennel along the south western boundary of the site. The site provides the main open / play space within the core of the town, as well as views to the east across the harbour area.

Existing view

Ideas for future change

1. Stepped terraces to create level play areas and seating areas
2. Play structures to provide physical and mental stimulation
3. Tree planting to screen and add visual interest
4. Play / activity structures to provide shelter
5. Lower level provides opportunity to accommodate renewable technologies such as old turbines
6. Floor area to be animated by patterns and information such as sign language
7. Historical references
8. Look out points

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 8 NESS BATTERY

Project
Ness Battery

Proposal

Open up the Battery for greater public access, engaging the local community such as schools and college.

Key Players

OIC, SCDT, SCC, local community/tour guides, HES

First steps

Seek advice from OIC regarding feasibility, canvas interest from local community, prepare management plan for the area

Timescale

Short to medium term

Existing view

Ness Battery

The Ness Battery was a crucial element of the defence of the western entrance to Scapa flow. The Battery lies at the south western edge of the town, next to the Stromness Golf Course (east and south) and agricultural land (west).

The site contains remnants of the historic military use with a number of wooden huts still present, whilst in the centre are a number of modern prefabricated units. The whole site is enclosed by a steel mesh fence.

Stabilisation and renovation works were completed in 2012. The site is now open and used for guided tours. Access is from the south along the Guardhouse Park track.

Exemplar project

As a starting point to illustrate what can be achieved within a similar context, Hoy's and Wall's wartime heritage, led by the Island of Hoy Development Trust, is presented as an exemplar project.

Based on the study of the Island of Hoy's WWII archaeological heritage in 2013, the project aims were to assess the legacy of the wartime heritage as a community catalyst, to establish whether this resource could be used to develop a tourism attraction and create revenue from it, and to see if this project could help to deliver a multi-generational approach.

Several activities have been implemented and could inspire a similar approach for opening Ness Battery to the public.

- A community archaeological survey
- Community school project using archaeological site investigation
- Outdoor educational geocache orienteering trail
- Drop-in/Open door sessions
- Evening talks and guided tours

Feedback and attendance have demonstrated a huge interest in developing the access to Lyness Naval base. The following outputs have been identified: archaeological resource management, community enhancement, tourism and education.

If all-year long site access remains an issue for Ness Battery, it is also worth mentioning the option of virtual interpretation (at a visitor attraction or in the library in Stromness). Several examples of virtual reality technology and games have been implemented by museums and HES alike.

Lyness Naval Base, Island of Hoy, Orkney

PROJECT 9 PATH ROUTES

Project

Develop path routes within the town centre, along the coast from the east to the west, and up to Brinkies Brae, and link to other destinations on the mainland.

Proposal

- Improve visitor signage in and from the town centre (including library and museum).
- Encourage walking, with joined up paths linked to bus stops and ferry terminal.
- Create a business directory of shops and opening times linked to signage strategy.
- Create and sign a range of accessible path loops from Copland's Dock to Navershaw, with the intention of ultimately extending to Brig o'Waithe.
- Develop a wider network of themed cycling/walking trails linked with renewables/heritage/arts along the coast and inland to the heart of neolithic Orkney, Hamnavoe and the beach.
- Conserve natural habitats.

Key Players

SCDT, OIC, SCC, Arts/business sectors, SNH

First steps

Agree scope of project, prepare proposals and seek funding

Timescale

Short to medium term

Le Pouliguen, France

Kjeksa, Bud, Norway

Path routes

The existing paths around the Stromness coast, and through the town, vary in quality and character. Rural paths are generally narrow foot-worn tracks, and accommodate walkers only. There is no lighting, and little or no signage or markers. Routes within the urban areas are mixed, on paths and along shared surface routes, but with little signage and no formal provision for cyclists.

Existing view

Ideas for future change

1. Upgraded footpath. Exact materials to be agreed and must be appropriate to location and use
2. Existing coastal habitats improved through new planting, including wildflower, bulbs and grasses
3. Artistic features to be incorporated into design / development, including walls and protection measures
4. Informal seating and view-points to be provided along the sea edge
5. Provision of platforms and access ramps to provide access for all to the water's edge

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 10 MAINTENANCE OF OPEN SPACE

Project
Maintenance of open space

Proposal
Develop a sustainable approach to grounds maintenance in partnership with the local community.

Key Players
OIC in consultation with the local community

First steps
Discussion between OIC, SCC and user groups to establish available resources, demand and scope the possibilities

Timescale
Short to medium term

Stromness-wide project

CATCH Leeds Community Garden maintenance

Community Scything, Little Wormwood Scrubs

PROJECT 11

OLD ST PETER'S CARE HOME

Project

Explore potential of existing St Peter's Care Home for other purposes

Proposal

Consider other uses such as student housing, low cost homes for local need, and specialist elderly housing through refurbishment and/or demolition and new build. The currently LDP allocation for this site, STR.26, states:

'A development brief would be required for this allocation. There may be culverted watercourses running through the site. The site includes a former manse, associated outbuildings and a walled garden; these should be retained in any redevelopment'

Key Players

OIC, SCDT, further/higher education institutions, OHAL, CPP

First steps

Feasibility study into future use

Timescale

Short to medium term

Existing view

Essômes-sur-Marne, France

PROJECT 12 REFURBISH TOWN HALL AND COMMUNITY CENTRE

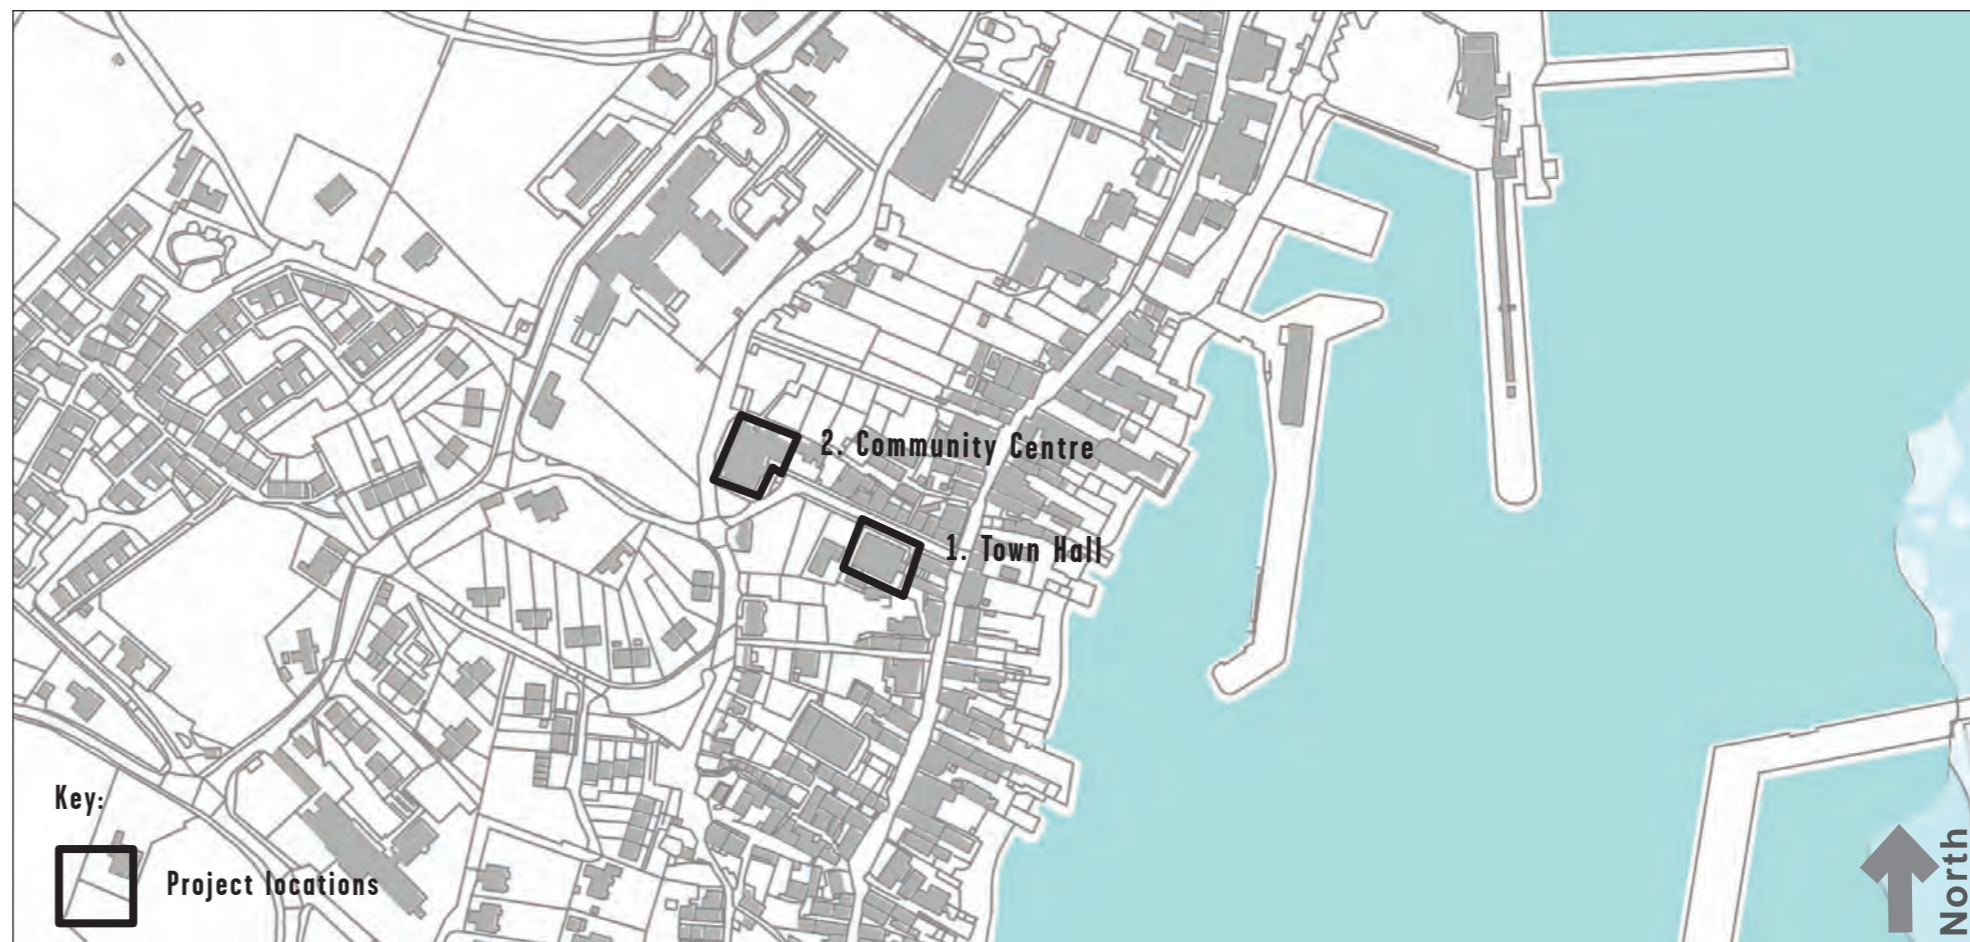

Project
Major refurbishment of Town Hall and Community Centre

Proposal
Major modernisation to provide internal toilets, changing facilities and disabled access.

Key Players
OIC Education dept, Friends of Stromness Town Hall

First steps
Feasibility study and identify funding - arts funds

Timescale
Short to medium term

Existing

Udny Community Centre after refurbishment

View of Town Hall at the heart of Stromness

PROJECT 13

A SAFER ROUTE TO SCHOOL

Project
Improve the safety of the route to school along Ferry Road

Proposal
New cantilever walkway and reorganisation of existing layout, to create continuous walking/cycling route to better connect the town centre with schools, Hamnavoe and Copland's Dock.

Key Players
SCC, SCDT, Community, OIC

First steps
Agree scope of project, prepare proposals and seek funding

Timescale
Short to medium term

River Liffy, Dublin, Ireland

Utrecht, Netherlands

Safer route to school

The existing safer route to school along Ferry Road connects Stromness Primary School, Stromness Academy and the residential areas of Hamnavoe with the core of Stromness town and Stromness Harbour / Marina. The route runs alongside the busy entry road into the town with no clear direction or division of pedestrian space. The route is unattractive and car dominated with no access to the water. At the southern section of the route the path gets lost within areas of car parking.

Ideas for future change

1. Potential cantilevered walkway to assist a safer route to school
2. 'Gateway' function indicating feature lighting and seating / meeting space
3. Improved walkway to better connect the town with Hamnavoe
4. Embankment improved with coastal edge planting

Existing view

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 14 FARAVEL AMENITY SPACE

Project

Faravel amenity space and former play area: accessibility & landscape improvements

Proposal

Revive as an intergenerational outdoor space for community use, such as small events and relaxation. Improved accessibility and landscape quality.

Key Players

Local residents, OIC

First steps

Form group, seek advice from OIC and Stromness Community Development Trust

Timescale

Medium-term

Ramped access accessible for all

Dalston amenity space, London

Faravel amenity space

The Faravel amenity space lies approximately halfway along the town, at its western edge. The site is approximately 1,100m² within a mainly residential sector of the town, although the space does connect to further green space north and south.

The site itself primarily consists of rough grassland, bisected by a narrow footpath which connects Faravel and the Back Road to the historic core, the main high street, Stromness Museum and the wider waterfront. The footpath is accessed from a narrow entrance at the east, whilst the western end steps and narrow access points make it inaccessible for disabled people.

Existing view

Ideas for future change

1. Community planting programme
2. Community shelter and events space
3. Community productive garden including raised planters
4. Community signage and identity on ground and pathways
5. Improved accessibility, through Faravel open space, for all
6. Combined cycle way and footpath

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 15 DRAMA CLUB SPACE FOR STORAGE AND REHEARSALS

Project

Drama Club space for storage and rehearsals

Proposal

Research opportunity for a building or piece of land for the club to rehearse, meet, store and construct sets. The drama club currently has limited space in terms of storage, space, and basic access to electricity.

Key Players

Stromness Drama Club

First steps

Approach OIC and SCDT for guidance

Timescale

Medium-term

Beacon Arts Centre, Greenock, Scotland

Images from recent productions staged by the Stromness Drama Club

PROJECT 16 HISTORIC PIERS

Project

Ensure the heritage value of the town's historic piers is recorded and the piers themselves are conserved.

Proposal

Condition survey and feasibility study to establish their condition and record heritage value of the piers, understand future risks from erosion and sea level rise, establish the works required to safeguard their future, and outline proposals for improved access from land and water, information, signage and interpretation.

Key Players

Piers Working Group, OIC, landowners, further/higher education institutions, ORCA.

First steps

Approach OIC and SCDT for guidance

Timescale

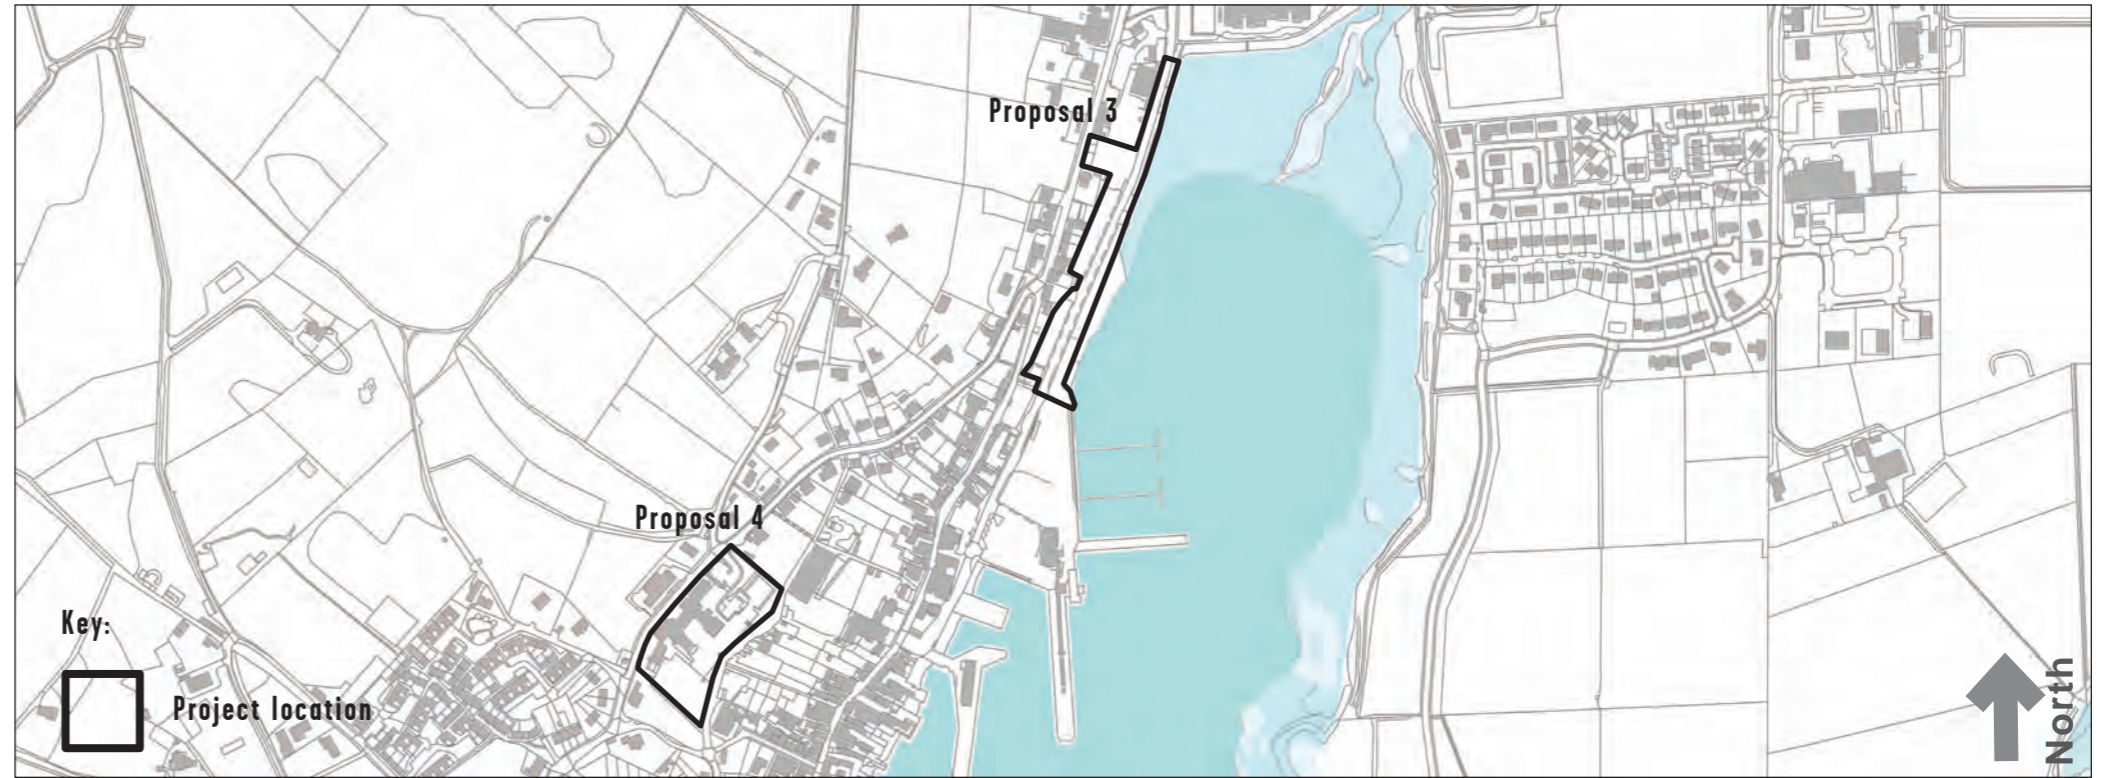

Medium-term

Archive pictures of the Piers Working Group

PROJECT 17

EV AND CAR PARKING

Project

Develop strategies and create appropriate opportunities to accommodate the cycle and electric vehicle charging needs of the town as well as the seasonal demands of summer tourists.

Proposal 1

Install cycle racks / shelters throughout the town at appropriate locations

Key Players

SCDT, Community, OIC

First steps

Agree scope of project, identify appropriate locations, prepare designs and seek funding.

Timescale

Short to long term

Proposal 2

Install community EV charging points throughout the town at appropriate locations

Key Players

SCDT, Community, OIC, OREF

First steps

Agree scope of project, identify appropriate locations of EV points, prepare designs and seek funding.

Timescale

Short to medium term

Proposal 3

Carry out a usage survey to inform the reallocation of space to create a more efficient and user friendly parking layout along Ferry Road which will complement the proposed cantilever pedestrian walkway.

Key Players

SCC, SCDT, OIC

First steps

Agree scope of project, prepare outline designs in tandem with the walkway proposals and seek funding.

Timescale

Medium term

Proposal 4

Develop an innovative design maximising the use of the topography for a multilevel car park at the Old Academy which would be available to staff, campus visitors, local residents and guests of nearby hotels.

Key Players

HW, EMEC, ORIC, OIC

First steps

Explore feasibility of options.

Timescale

Medium to long term

View of approach in to Stromness including existing car parking along Ferry Road

PROJECT 18 WATERSPORTS HUB

Project
Watersports hub

Proposal
To create a watersports hub, including a new building with changing facilities at old slipway, for sailing, kayaking, rowing, and openwater swimming. Phased project including slipway upgrade and enlargement. Provide outdoor storage to share with the golf club.

Key Players
Other watersports clubs
Landowners

First steps
Approach landowners and golf club to establish scope of project and how to move it forward

Timescale
Medium to long term

Dundee, Scotland

Faaborg, Denmark

Watersports hub

The Watersports Hub is proposed to be located at the existing sailing club at Ness Point, at the southern end of Stromness. Access is from the southern end of Ness Road, which also provides access to the Point of Ness Caravan and Camping Site.

The site is approximately 0.56ha, and is a mix of hard standing and grass. There are a number of buildings on the site, old stone and slate buildings, a large storage shed and temporary cabins. A number of boats are scattered across the areas of grass, whilst formal storage is provided at the southern edge of the site with a fenced and gated space.

Existing view

Ideas for future change

1. Existing slipway to be enlarged and expanded to accommodate various boat sizes
2. Potential to include pontoon walkway for alternative water sports
3. Redevelopment of existing building / development of new building as a 'Watersports hub'
4. Re-organised boat storage and maintenance area
5. Improved signage and identification of facility
6. Re-organised access / entrance point to create sense of arrival

Ideas for future change - annotated visualisation

Ideas for future change - visualisation

PROJECT 19 CAMPSITE EXTENSION

Project

Renewal and upgrade of existing campsite in Stromness.

Proposal

Providing expanded campsite accommodation and improving facilities within Stromness. Options include extension of the existing facilities at Ness Point, subject to demand. Another option for overspill provision could be the Market Green.

Key Players

OIC

First steps

Approach relevant landowners to establish location and scope of project and how to move forward.

Timescale

Medium to long term.

Campsite at Ness Point

PROJECT 20 STROMNESS MUSEUM EXTENSION

Project
Stromness Museum

Proposal
Extension of existing museum building and facilities

Key Players
Stromness Museum and local community

First steps
Planning approval and funding research

Timescale
Long term

Stromness Museum

PROJECT 21 HOUSING

Project Housing

Proposal

Identify and develop existing and new opportunities for a range of housing across Stromness, including self-build plots. Any future extension to the town's settlement boundaries should maximise access by foot and bicycle to the town centre.

Key Players

OIC, landowners, OHAL, local contractors

First steps

Discussion with OIC

Timescale

Long term

PROJECT 22 MARINA UPGRADE

Project
Marina and associated facilities

Proposal
Improvement and expansion of existing marina facilities

Key Players
OIC and relevant clubs and users

First steps
Discussion between OIC, Orkney Marinas and relevant clubs

Timescale
Long term

Stromness Marina

Stromness from the bay

6. DEVELOPMENT PRINCIPLES

Six key principles have been established to **guide all existing and future projects and development in Stromness**. These development principles are set out below.

1. SUSTAINABILITY

Zero-carbon by 2030 through the mitigation and adaptation of climate change management practices, for example with high quality built environment and low-carbon transport, district heating, renewable energy solutions etc.

2. A STRONG SUPPORTED LOCAL ECONOMY

Economic sectors in renewable energy, arts, digital and fishing lead the way, with cross-sectoral working.

3. A VIBRANT TOWN CENTRE

Town centre vibrancy exists all-year round with more shops, eating places and a reduction in the number of empty shops.

4. QUALITY DESIGN

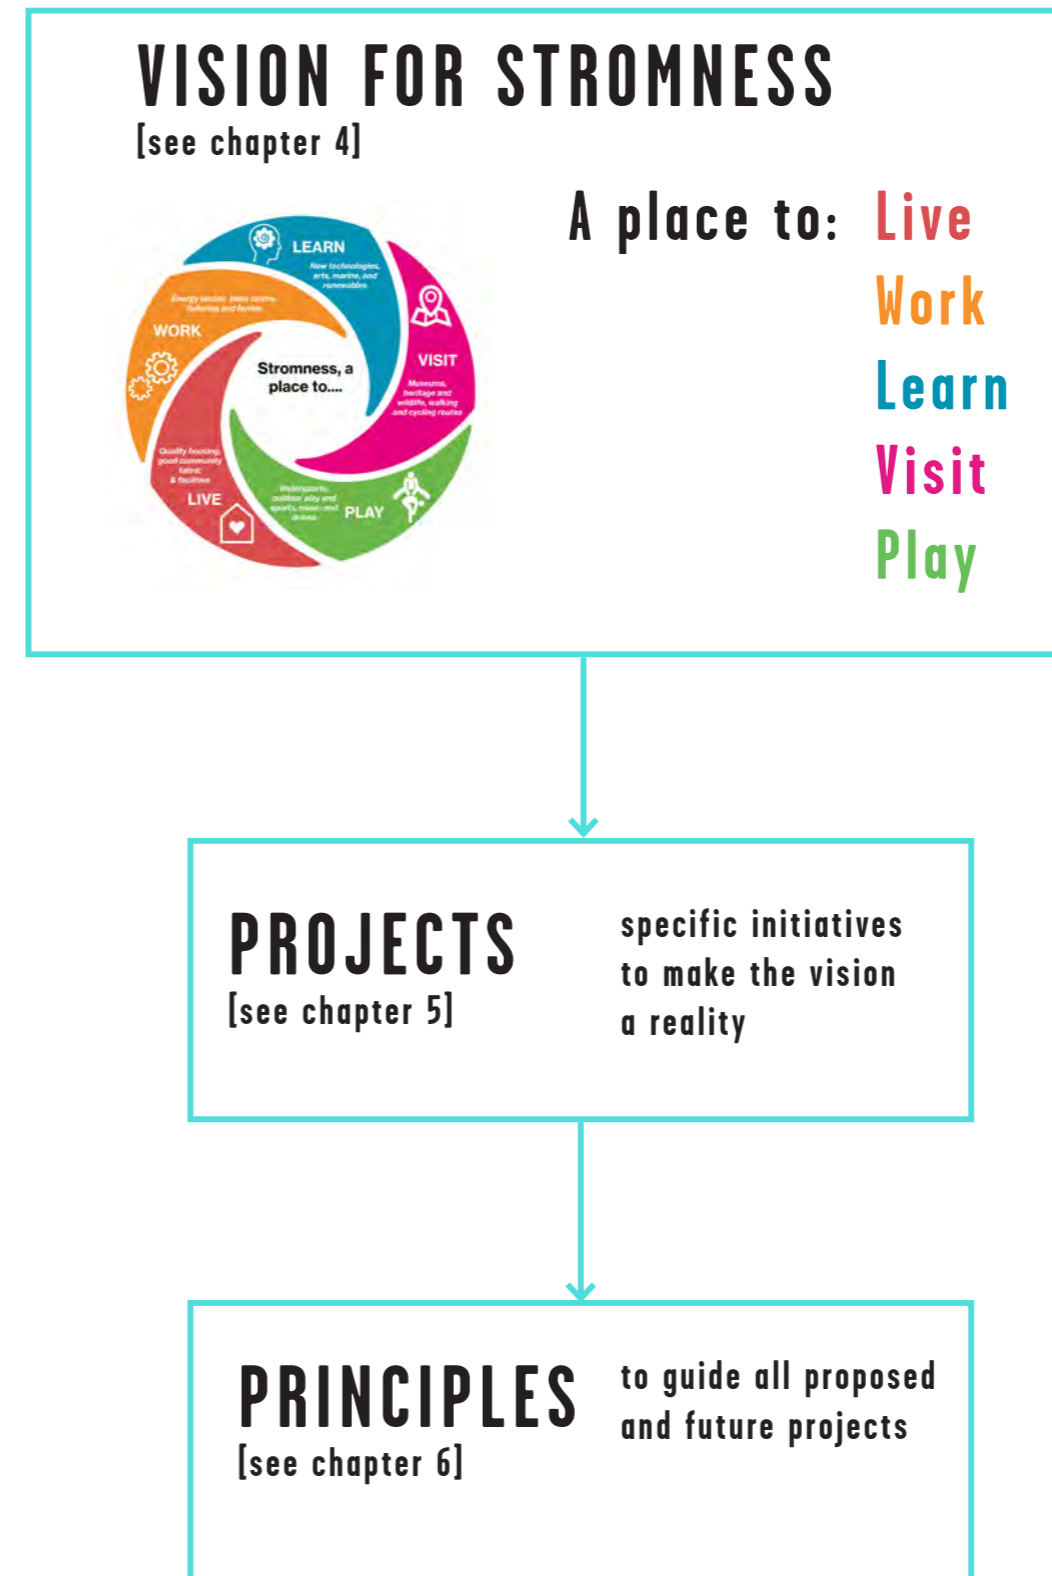

Inspired good design reflects the local vernacular and brings colour to the townscape, housing and other new developments.

5. MULTI-FUNCTIONAL PLAYSPACES

A network of local play spaces around the town are accessible to all and encourage play, biodiversity, outdoor learning, food growing and nature conservation for all age groups.

6. COMMUNITY LIFE

Community facilities are fit for purpose, offering a good mix of accommodation and services for the local community, and managed appropriately with and for the local community.

View of historic buildings on the pier

7. NEXT STEPS

The strategic vision, development principles and action plan in this report have been co-produced with the local community in Stromness. The document helps the local community to achieve its vision by:

- *Providing a long term strategic vision and principles against which future projects and initiatives can be assessed.*
- *Identifying a list of priority projects and relevant partners as appropriate.*
- *Supporting individual community projects to progress to the next stage, whether that be by seeking funding, volunteers or premises.*
- *Helping the Council and its Community Planning partners to understand the local community's aspirations, and so target their services and investments to be as responsive as possible.*
- *Informing the next reviews of the Local Development Plan and Stromness Settlement Statement, particularly in relation to issues such as the location and nature of new housing, how and where the town should grow in the future, the design quality of new development, retaining a vibrant and populated town centre, and how the town should adapt to sea level rise.*

It is recommended that the community agrees one or two projects on which to focus on and deliver within the next 12 months. This will help to maintain momentum, recruit community volunteers and sustain enthusiasm for the long term.

Proposed project panels at second community event
