3.2.

An action plan was developed to address the Improvement Areas outlined in the Care Inspectorate report, which is routinely updated and monitored. Progress has previously been reported to the Council on 11 June 2020 and to the Policy and Resources Committee on 3 December 2020.

5. Progress Inspection

5.1.

The return Care Inspectorate, Progress Inspection, visit is planned for 12 April 2021 (April to June) and is expected to conclude and report in July 2021.

5.2.

The Inspection will largely be conducted remotely and there will be file reading, focus groups and professional discussions and other engagement.

5.3.

Each service will have to find suitable ways of allowing the Inspectors access to their files remotely.

5.4.

There remains a possibility a small Care Inspectorate Team may wish to travel to Orkney but this is not certain and will depend on travel restrictions nearer the time.

6. Corporate Governance

This report relates to the Council complying with governance and scrutiny and therefore does not directly support and contribute to improved outcomes for communities as outlined in the Council Plan and the Local Outcomes Improvement Plan.

7. Financial Implications

7.1.

There are no immediate financial implications arising from the report recommendations.

7.2.

There are however significant financial implications associated with delivery of services to ensure appropriate and effective services for children and young people in need of care and protection. The improvement planning actions and outcomes required, as a result of the inspection will involve identifying additional resources, inclusive of human, capital and revenue.

7.3.

There are common themes running through the progress report of gaps in service provision and underinvestment in infrastructure, staffing and training. Rectifying these shortcomings to ensure delivery of appropriate and effective services for children and young people in need of care and protection will require a significant investment of resources. In the context of a services with a significant savings target to achieve this will be challenging.

8. Legal Aspects

There are no immediate legal implications arising from the recommendations contained in this report.
